### **Part III DETAILED ACTION**

#### ***Notice to Applicant(s)***

1. This application has been examined. Claims 1-5 are pending.
2. The Group and/or Art Unit location of your application in the PTO has changed. To aid in correlating any papers for this application, all further correspondence regarding this application should be directed to Group Art Unit 2181.

#### ***Specification***

3. The title of the invention is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

#### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

5. Claims 1-5 are rejected under 35 U.S.C. § 102(e) as being anticipated by Evoy (US No. 6,062,480).

In regard to claims 1-3, Evoy discloses an interface device 18 for establishing an interface between a CPU 26 and an external unit 28, comprising a timer, a mask portion and an interrupt controlling wherein the timer portion asserts a mask signal when detecting that a wait signal outputted from the external device is kept asserted for more than a predetermined period of time (see 4, lines 50-64); the mask portion masks the wait signal and outputs to the CPU when the mask signal is asserted (see col. 3, lines 54-66) and the interrupt portion issues an interrupt signal to the CPU when the mask signal is asserted (see col. 3, line 34-44).

In regard to claims 4-5, Evoy discloses wherein the CPU detects the interrupt signal thereby to recover the external unit (see col. 3, line 66 through col. 4, line 3).

### ***Conclusion***
